*Rates are per 100,000 persons and are age-adjusted to the 2000 U.S. standard population.

†Data are from the National Vital Statistics System (NVSS).

-Rates and counts are suppressed if fewer than 16 cases were reported in a specific category (site, sex).

- Counts are suppressed if either the corresponding male count or female count is suppressed but not both

NA = not applicable

Confidence interval (CI): Range of values for a rate that will include the true value of the rate a given percentage of the time. Example: 95% CI includes the true value of the rate 95% of the time.
